

Nanjing SCIYON Automation Group Co, Ltd.was originally established in 1993, headquartered in Nanjing,China, and listed on Shenzhen Stock Exchange in 2010. After rapid development of 20 years,and by adhering to the company tenet of "Make industry full of smarts", SCIYON has specialized in industry automation andhas formed four major industrial fieldswhich includes process industry informatization, process automation, sensing technology and measurement-control device, robot and intelligent manufacturing. Furthermore, SCIYON has produced top products and solutions for electric, chemical, metallurgy, building materials, municipal, and many other industries, which lead to excellentperformances throughout more than 20 countries such as Russia, Indonesia, and India.

PRODUCTION

Sophisticated Production Equipment

Scientific production process, high precision production equipment, international first class testing instrument, and various high-performance assembly tools, all of which guarantee the product's quality.

Standardized Production System

In accordance with the process file strictly, from the design of the solution to the selection of raw materials, from production and inspection of the module product to assembly, test and simulation test of the system, from efficient and unified logistics system of the company to operation on user site, every detail reflects SCIYON's interpretation on value of "reliable quality".

PRODUCT

01

Process Industry Informatization

- SyncBASE Real-time Database
- Enterprise Asset Management(EAM)
- Office Automation(OA)
- Material Management
- Production-operation Management
- Safety Management
- Business Management
- SCIYON Wisdom Cloud

02

Process Automation

- NT6000 Distributed Control System
- DEH-NTK Turbine Digital Electro-Hydraulic Control System
- SY8000Turbine Digital Electric Hydraulic Conditioner
- Parameter Detection And Optimization Control For Combustion
- Virtual DCS Simulation
- Rotating Machinery On-line Monitoring And Protection System

03

Sensing Technology And Measurement And Control Device

- Input Acquisition Front-end Of Intelligent Thermal Resistance/Thermocouple
- Intelligent Electric Actuators
- Flow Integrating Instrument
- Frequency-governing Speed-regulating Electric Actuators
- Rotating Machinery Monitoring Instrument
- Sensors

04

Robot And Intelligent Manufacturing

- SyncView HMI
- Integrated PLC
- General-purpose Inverter
- High-performance Inverter
- AC Servo Motor
- Standard AC Servo Drives
- Economical Servo Drives
- Condenser Online Cleaning Robot
- Motion Controller
- Drive And Control Integrated Machine
- Display And Control Integrated Machine
